

Application for FIRST Robotics Team 456

FIRST Robotics Team 456, Siege Robotics, provides students the opportunity to engage in engineering, science, technology, and business skills in a high-energy environment. Siege Robotics motivates students from all walks of life to develop skills through participating in a real life, hands-on experience. Siege Robotics has competed in FIRST (For Inspiration and Recognition of Science and Technology) Robotics Competition (FRC) for 19 years. FRC exposes students to engineering, fabrication, programming, web design, photography, presentations, writing, business processes, and much more. Studies have shown that participants in FRC are:

- Three times more likely to major in engineering.
- Ten times more likely to have had an internship or co-op in their Freshman year of college.
- More than twice as likely to pursue a career in science or technology
- More than twice as likely to volunteer in their communities.

Siege Robotics depends on funding provided by sponsors and students to cover the team expenses such as travel costs, registration fees, and building components. We expect to cover most of the costs through grants and fundraising activities to minimize the amount paid by the students. Each student will be assessed an activity fee and an additional travel cost for EACH trip THEY participate in during the year. Additional travel costs will be determined based on the location of the events we attend. We plan on attending 2 regional competitions again this year and the championship event in St. Louis if we qualify.

The activity fee of \$250 is fixed and due by 31 December 2018. Additional travel costs will be determined based on grants awarded, fundraising, and actual travel costs.

All applications will be reviewed for missing or inaccurate information and a review of the student's academic records will be conducted by the schools. Applications will be reviewed by a selection committee made up of adult team mentors. Based on this review, the best applicants will be scheduled for an interview.

The team will be limited to approximately 35 students, hard decisions will have to be made and ultimately not everyone that applies will be accepted. **Each student is required to complete an application, including returning members. Being a member of the previous year's team is no guarantee of a place on this year's team.**

A completed application packet includes several elements:

- Student Application Form (*Required*)
- Resume (*Optional*)

Completed applications may be submitted electronically (preferred) or in hard copy. If possible, all parts of the application should be submitted together. An electronic application can be downloaded from www.siegerobotics.org.

Questions about the application and admissions process may be directed to Info@456Robotics.org.

Submission methods: (Any other delivery method will not be accepted.)

1. Complete on-line application - www.SiegeRobotics.org
2. E-mail a PDF file to Applications@456Robotics.org
3. Hard copy submissions to:
456 Robotics Applications
P.O. Box 821792
Vicksburg, MS 39182
4. Hand delivered to a Lead Team Mentor (Chuck Dickerson or Ginny Dickerson).

Student's Information

Name: _____

Date of Birth: _____ Gender: Male / Female U.S. Citizen: Yes / No

Where do you attend school?: _____

Grade Level: _____

Contact Information

Home Address: _____

Home Phone: _____ Cell Phone: _____ Text OK? Yes / No

Email(s): _____

Other Contact Info (FaceBook, etc.): _____

Parent or Guardian's Information

Name(s): _____

Home Number(s): _____

Cell Number(s): _____

Work Number(s): _____

Employer(s) _____

Email(s): _____

Please check all of your Interests, Skills, Hobbies, and Experience:
